

2017 City Council Priorities

On January 30, 2017, the Mounds View City Council and members of the management team held a planning and goal-setting retreat at the Mounds View Community Center. The City of Mounds View provides a variety of core and essential services to its residents, property owners and business owners. Each of these service delivery areas is an acknowledged and supported priority and each supports the City's Mission, Vision and Values statements. Recognizing that such core and essential services are ongoing priorities, the City Council has chosen to focus particular attention this year on the following identified goals and priorities:

- Focus on Racial Equity—Promote Ideals of Inclusionary Community
- Develop Water Infrastructure Rehabilitation and Financing Plan
- Develop the Vision Associated with Crossroad Pointe
- Focus on Personnel--Attract and Retain Quality Employees
- Promote Positive Partnerships and Outreach Efforts between the Mounds View Police Department and the Community it Serves
- Explore Additional Renewable Energy and Energy Efficiency Improvements; Pursue Green-Step City Designation Level 2
- Approve and Implement the Long Range vision for City Hall Park
- Develop and Approve a Sustainable Streets and Utilities Maintenance and Reconstruction Program

In addition to the above, the City Council continues to believe that the Mounds View Boulevard corridor is a key component in the City's redevelopment vision. A vibrant, easily accessible and aesthetically pleasing commercial corridor will be Mounds View's foundation upon which our other amenities and community assets will be strengthened and reinforced.

(Approved March 13, 2017, Resolution 8731)
